MICROFILM CORR

Methylene Blue
Analysis

CUSTOMER NAME: Micor Corp
ADDRESS: 800 Clamont Ave Bensalem, PA. 19020

Your sample film strips have been tested for archival quality (residual thiosulfate concentration). They were tested according to the methylene blue method described by the American National Standards Institute. Concentrations of less than (1) 1.4 mg (microgram) indicate archival quality, and greater than (2) 1.4 mg indicate non-archival quality. The test is only meaningful and accurate if performed no later than two weeks after processing. It is our understanding that we have received your film within the 2 week time-frame. Actual test readings are provided below, as well as "pass/fail" check marks.

TEST IDENT.	ACTUAL CONCENTRATION	MEETS ANSI STANDARD (< 1.4 mg)	DOES NOT MEET ANSI STANDARD (> 1.4 mg)
MARRIAGE Bureau 1948-49	.14	✓	

Archival quality, as measured by residual thiosulfate concentration, is defined in ANSI standard (F5.1-AS: "A photographic film composed and treated so that under archival storage conditions it is suitable for the preservation of records having permanent value". This same Standard sets the archival limit at 1.4 mg for residual thiosulfate.

Comments: _____

1943

QUEENS

A 3x3 grid of numbers from 1 to 9, rotated 45 degrees clockwise. The numbers are arranged in a pattern that suggests a magic square, but the rotation makes them difficult to read. The numbers are: 1, 2, 3, 4, 5, 6, 7, 8, 9.

BIELS SINCE 1938
MICROFILM CORP.

Methylene Blue
Analysis

CUSTOMER NAME: Micor Corp.
ADDRESS: 800 Clarmont Ave. Bensalem, PA. 19020

Your sample film strips have been tested for archival quality (residual thiosulfate concentration). They were tested according to the methylene blue method described by the American National Standards Institute.

Concentrations of less than (<) 1.4 mg (micrograms) indicate archival quality, and greater than (>) 1.4 mg indicate non-archival quality. The test is only meaningful and accurate if performed no later than two weeks after processing. It is our understanding that we have received your film within the 2 week time-frame.

Actual test readings are provided below, as well as "pass/fail" check marks.

TEST IDENT.	ACTUAL CONCENTRATION	MEETS ANSI STANDARD (<) 1.4 mg	DOES NOT MEET ANSI STANDARD (>) 1.4 mg
Machings Bureau 1948-49	.14	✓	

Archival quality, as measured by residual thiosulfate concentration, is defined in ANSI standard 19.1-45: "A photographic film composed and treated so that under archival storage conditions it is suitable for the preservation of records having permanent value". This same Standard sets the archival limit at 1.4 mg for residual thiosulfate.
